

## ESG ENVIRONMENTAL POLICY

---

ES Global Ltd are experts in the provision of bespoke, temporary structures, event overlay and staging events, with substantial projects taking place across the music, sports, cultural, and public sector markets both in the UK and globally.

The Company recognises the activities of its business has the potential to impact the environment both locally and further afield, these impacts are recognised as being negative as well as positive.

The company is committed to the continual improvement of its environmental impact and protection of the environment including but not limited to:

- Maintaining an Environmental Management System in line with the requirement of ISO 14001.
- Driving continuous improvements in the resources efficiency, such as energy consumption, materials and water, etc.
- Preventing unnecessary environmental pollution from its activities such as greenhouse gas emission, waste generation, wastewater, etc.
- Reducing the overall energy consumption and achieving Carbon Net Zero by 2040 through implement various energy saving programmes and purchasing energy efficient products.
- Enhancing awareness of environmental and resources efficiency matters among our stakeholders.

ES Global has identified these activities which interact with the environment; these have been detailed on the company aspects register. A risk based approach has been applied to aid the company in identifying its significant aspects and impacts.

From these identified significant aspects, the organisation has set objectives, targets, and programmes for control and improvement which are monitored during the company management review process. The overall environmental performance will be reviewed regularly, and the corresponding impacts will be integrated into the corporate strategic decision-making. ES Global will ensure this policy is available to all employees and allocate necessary resources to ensure the corporate objectives and targets can be achieved.

The company are committed to compliance with any applicable legal requirements, a summary of these have been identified in the register of legislation and against the associated company aspect.

ES Global recognise that in addition to legislative requirements it has a duty to comply with any other requirement associated with its environmental aspects, commonly this will take form of contractual requirements with clients.
